

Ladder inspection and safety

Supplementary to company standard operating procedures

Duration

Full Training (Novice): 2 Days

Recertification Training/Evaluation: 1 Day

Remedial Training: 1 Day

Students

Minimum of 6 to a Maximum of 10

Course outline

- Introduction
- Common Causes of Ladder Accidents
- When is a ladder the most suitable access equipment?
- Selecting/buying safe ladders and stability devices
- Is it a safe place to use a ladder or stepladder?
- Is the ladder or stepladder safe to be used?
- What are pre-use checks and detailed visual inspections?
- Do my ladder-users know how to use them safely?
- Responsibilities
- Management
- Procedure
- Ladder Installation
- Inspection and Maintenance
- Basic Pre-Use Checklist

Each learner will receive

- A learner workbook including progress quizzes
- Logbook and checklist example templates
- A portfolio of evidence of practical and theoretical evaluations

Assessment methods

We conduct a formative theoretical assessment at the beginning of the course to gauge the learner's initial understanding (novices only). At the end of the training, a summative theoretical, as well as a practical application assessment is conducted, and the learner is found competent, and if not, additional developmental areas are identified and suggested.

This Multimedia Training Programme Includes:

Detailed subject notes and illustrations

Progress quizzes keep learning on track

An overhead slide presentation providing supplementary information

Videos illustrate best practices, case studies, and operational examples
