

Upon completion of this course, the delegates will have knowledge and understanding of the scope and impact of the risk assessment process, including the legal requirement imposed upon the employer. for the completion of suitable and sufficient risk assessments. This course puts the emphasis on practical exercises, meaning that delegates will leave with the ability to perform risk assessments in their own organizations.

This Multimedia Training Programme Includes:

Detailed subject notes and illustrations

Progress quizzes keep learning on track

An overhead slide presentation providing supplementary information

Videos illustrate best practices, case studies, and operational examples

- Using the risk value table
- Risk assessment questions
- Preventative/corrective actions
- Documentation

Each learner will receive

- A learner workbook including progress quizzes
- Logbook and checklist example templates
- A portfolio of evidence of practical and theoretical evaluations

Assessment methods

We conduct a formative theoretical assessment at the beginning of the course to gauge the learner's initial understanding (novices only). At the end of the training, a summative theoretical, as well as a practical application assessment is conducted, and the learner is found competent, and if not, additional developmental areas are identified and suggested.
